

## AmmonitConnect

Easy access to Ammonit's data loggers

Ammonit**Connect**  
Remote Access

### Description

AmmonitConnect provides easy access to Meteo-40 plus data loggers. No need to buy an expensive SIM with a public IP address.

- The service is completely free of charge.
- No measurement data is stored on our server. AmmonitConnect only acts as a pass-through for the user.

Note, that AmmonitConnect is for Meteo-40 plus, while older Meteo-40 use the tunnel, which is similar in scope and features.

Your access to AmmonitConnect is [https://<serialnumber\\_datalogger>.connect.ammonit.com/](https://<serialnumber_datalogger>.connect.ammonit.com/)

You can purchase the AmmonitConnect software and run an instance yourself. Please contact our [sales team](#) for details.
