AmmonitVerify

Easy verification of the digital signatures of signed measurement data

Description

https://verify.ammonit.com/

AmmonitVerify facilitates easy verification of digital signatures created by Ammonit Meteo-40 or AmmonitOR.

It also allows decryption of encrypted files by providing the encryption password.

• The service is completely free of charge.
• Data files are not stored on our server, signature files are only stored temporarily, and passwords are only stored for the brief moment of decryption.

You can purchase the AmmonitVerify software and run an instance yourself. Please contact our sales team for details.
